

VDL Groep

VDL AEC Maritime is part of VDL Groep, an international industrial family-owned company with 104 operating companies, spread over 20 countries and with more than 16,854 employees. It is a conglomerate of flexible, independent companies, each with its own specialty. The strength of VDL Groep lies in the mutual cooperation between the companies.

VDL AEC Maritime operates in the finished products division. This division comprises suspension systems for the automotive industry, heating, cooling and air-technical systems, systems for the oil, production automation systems, gas and petrochemical industry, systems for the agricultural sector, sunbeds, roof boxes, container handling equipment, waste collection systems, cigar-making and packaging machines, components for bulkhandling and dust extraction installations and systems for explosion and fire protection.

The other divisions are subcontracting, car assembly and buses & coaches. In subcontracting, VDL specialises in metalworking, mechatronic systems and system supply, plastics processing and surface treatment. The car assembly division includes the production of passenger cars for third parties. The bus & coach division includes chassis & chassis modules, coaches, public transport buses, mini & midi buses, special projects and second-hand buses.

Strength through cooperation

VDL Groep

VDL Groep, headquartered in Eindhoven, the Netherlands, is an international industrial family business with 104 operating companies, located in 20 countries, with 16,854 employees. 83% of our sales is export related and we deliver to 111 countries.

The VDL companies break down into four divisions:

OUR SCRUBBER

SIMPLICITY

Over the years, VDL AEC Maritime has managed to make scrubbing simple. Our scrubber is easy to operate and can be installed into any vessel.

OPEN TOWER

Our scrubber has an open structure, no rotating components or filters and therefore low maintenance required. Because of the patented design, we guarantee an optimal reaction between exhaust gas and seawater.

INLINE SCRUBBER

Our inline scrubber has a small footprint and is able to run dry.

QUALITY

We have selected the best materials and components to ensure the highest quality scrubber system.

VDL AEC Maritime

VDL AEC Maritime is a scrubbing specialist. Our experience includes extensive research on reducing emissions and odors. In the last 20 years, we have created and implemented over 2,300 land based scrubbers and since 2013 also many SOx scrubbers for the maritime industry.

VDL AEC Maritime is focused on the design, development, sales, in-house manufacturing and commissioning of high quality innovative products and systems.

ENGINEERING

INSTALLATION

Installation is done by a shipyard, directly ordered by customer. VDL AEC Maritime can offer site supervision, electrical- and mechanical support for the yard.

VDL KTI

VDL KTI is an engineering-supported manufacturer based in Belgium. With two premises, Mol and Arendonk, VDL KTI has a total area of 67,000 m² and more than 130 employees. The company was established in 1973 as KTI Belgium and has built a solid reputation throughout the years as a dedicated manufacturing partner in oil, gas and petrochemical industry and other industries throughout Europe and worldwide. VDL KTI is located 45 km away from the headquarter of VDL AEC Maritime which makes it very convenient to check the daily production of our high quality scrubber towers.

SERVICE NETWORK

24/7 global tailored solutions for each service request.
